It is suggested that all material which is sent to the Field be regarded as Creep operations and be given a Creep number accordingly but that the material sent for local distribution (such as Creep 37 - 2 suitcases of sabotage material for 7484) should not be regarded as Creep operations.

It is suggested that D/Fin might be interested to see a copy of the report in order to give him some indication that the funds sanctioned for the routes based on 7408's town are being put to good use.
